Contributing to World Peace through Publishing Language Teaching Materials
– Fostering Networks between People and Widening the Circles through Which They Meet –
Masako Fujisaki
President
3A Corporation

Our company was established in 1973, and began by publishing *Nihongo no Kiso* (edited by the Association for Overseas Technical Scholarship), a Japanese language textbook that was mainly aimed at technical trainees; and now, all these years later, thanks to the help and support of many people, we are celebrating our 47th year.

Over these years, in response to the changes in the society in which Japanese language education is conducted, as well as the demands of the times and actual needs on the ground in education, we have been planning and publishing various language teaching materials and books with a focus on “easiness of learning” and “easiness of teaching.” Among these, in particular, the *Minna no Nihongo* series of textbooks has been widely adopted both inside and outside Japan as a general Japanese language textbook, both at the beginner and intermediate levels. Not only in developing new teaching materials but also when revising older materials, we are constantly in contact with local educational establishments, producing and providing materials that meet their new needs.

On top of the Japanese language materials presented in this book, we also produce language textbooks for Japanese learners of foreign languages, including books for those studying for the TOEIC examination, and our *Lesson* series of textbooks which covers the study of various Asian and European languages.

Interest in Japan and the Japanese language is certainly spreading, and there are now people all over the world interested in Japanese culture and studying the Japanese language. At the same time, the number of Japanese learning foreign languages, starting with English, interacting with people from various countries, and working to understand different cultures is increasing.

We hope that through the publication of teaching language materials and books that allow various types of interaction between people in a multicultural society, we can foster networks between people and broaden the circles through which people can meet, and thereby continue to contribute to world peace.

We would appreciate everyone’s further support and encouragement.

3A Corporation

Welcome to *Minna no Nihongo Shokyu Second Edition*

Minna no Nihongo is a long-selling and classic textbook series for both teachers and learners of Japanese alike. With its use of short-term intensive study, easy-to-understand language presentation, a cast of characters in practical conversational settings, etc., it guarantees that the learner is able to make conversation in everyday life in the shortest time possible. The two books in the series will enable the general adult learner to make simple conversation (*Minna no Nihongo Shokyu I Second Edition Main Text*) or more advanced conversation (*Minna no Nihongo Shokyu II Second Edition Main Text*) in daily life situations. Through accumulated study, the learner will build up and develop his/her basic speaking ability.

**What is actually in the *Minna no Nihongo Second Edition Textbooks*?**

There are 25 lessons in Main Text I and 25 in Main Text II, making a total of 50 lessons. Each lesson comprises the following: sentence patterns; example sentences in the form of a question and answer to show how the sentence patterns are used; a basic conversation between various people in a variety of situations in Japan, using everyday language and the words and sentence patterns being studied; exercises (divided into three levels: A, B and C) to gradually build up the learners' skills, from learning systematically the basic sentence patterns, strengthening the learners' grasp of the same, and showing their usage in actual situations; and finally practice, including listening, grammar and reading practice. A review is also provided every so many lessons to go over the essential points studied.

When studying with *Minna no Nihongo* by yourself, what books do you need?**Main Text**

The central book of the series is the Main Text (see page 8 of this catalogue), or 'Honsatsu,' in Japanese. Main Text I comes in two versions: Kanji-Kana-ban, which is written in Japanese characters (Chinese characters and hiragana and katakana syllabaries), and Romaji-ban, which is written in the Roman alphabet, for those who cannot read Japanese characters. If you only want basic Japanese conversation and don't feel you will need to read or write Japanese, the Romanized Version is probably for you (though please note that there is no Romanized Version of Main Text II). If you feel you will need to read and/or write Japanese or wish to take your studies further than basic conversation, we suggest you use the Kanji-Kana Version. This will require that, to begin with, you have to study hiragana and katakana. An ideal book for this is the *Self-Study Kana Workbook* (see page 14 of this catalogue). As all the kanji (Chinese characters) in the Main Text come with transcription into hiragana, learning this is essential for studying with the Kanji-Kana Version. The accompanying CD includes a recording of all the conversations and many of the exercises found in the Main Text.

Translation and Grammar Notes

The other book that is essential for your studies is the Translation and Grammar Notes, or 'Honyaku Bunpo Kaisetsu,' in Japanese (see page 8 of this catalogue). This provides a translation of all the new vocabulary, reference words, sentence patterns, example sentences and conversations found in *Minna no Nihongo* as well as an easy-to-understand explanation of all the important grammatical structures, plus cultural information. This is available in 12 languages, including English and Chinese, and all the other major Asian and European languages.

Basic Workbook

The above two books are the main components you need to study *Minna no Nihongo* by yourself. However, a third component would be the Basic Workbook (see page 9 of this catalogue), or 'Hyōjun Mondai-shu,' in Japanese. This workbook is a collection of exercises and tests devised to confirm, consolidate

and reinforce what has been learnt in each chapter of the Main Text. It is a great way to review your progress in your studies.

Supplementary Texts

The above three books are enough to give the learner a basic start. However, if he or she wishes to take his/her studies further, the books outlined below will be of great use. Their necessity will depend on the area(s) the learner feels he or she needs to focus on.

For focusing on your reading and writing skills:

Minna no Nihongo Shokyu Dai 2-Han Shokyu de Yomeru Topikku 25 (Second Edition Reading Comprehension Texts): page 10

Minna no Nihongo Shokyu Dai 2-Han Kanji (Second Edition Kanji): page 10

Minna no Nihongo Shokyu Dai 2-Han Kanji Renshucho (Second Edition Kanji Workbooks): page 10

Minna no Nihongo Shokyu Dai 2-Han Yasashii Sakubun (Second Edition Basic Writing Practice Workbook): page 11

For focusing on your listening skills:

Minna no Nihongo Shokyu Dai 2-Han CDs (Second Edition CDs): page 9

How to use the books effectively

1. Learn the words

The Translation and Grammar Notes introduces the new words for each lesson. Learn these new words by practicing making short sentences with them.

2. Practice the Sentence Patterns

Make sure you understand the meaning of each sentence pattern, and do Exercises A and B aloud until the pattern becomes automatic.

3. Practice holding conversations

Practice the sentence patterns using the short dialogues given in Exercise C, but don't stop there; carry on and extend the conversations. The conversations simulate everyday situations that students are likely to encounter, and the best way of acquiring a natural conversational rhythm is to act out the conversations using gestures and facial expressions while listening to the CD.

4. Check your understanding

Each lesson ends with some practice questions which you should use to check that you have correctly understood the lesson.

5. Apply what you have learnt

Try talking to Japanese people using the Japanese you have learnt. Applying what you have learnt right away, before you forget it, is the quickest way to progress.

Free Audio Content

The audio content of the CDs accompanying *Minna no Nihongo I* and *II Main Texts*, as well as other *Minna no Nihongo* texts, is now available for free downloading or streaming. For details, please visit the relevant book's Web page.

Minna no Nihongo Shokyu Dai 2-Han Honsatsu*Second Edition Main Textbooks*

Edited by 3A Corporation

Since it was first published in 1998, *Minna no Nihongo* has been a long-selling and classic textbook for both teachers and learners of Japanese alike. Now the series has been reborn in this second edition, with the vocabulary and conversational settings revised (words that have gone out of usage have been replaced with new expressions frequently in use, and conversational settings have also been updated), and a CD of the dialogues and exercises included with the book. Illustrations for use in reviewing have also been increased. The grammar syllabus is basically the same, however, allowing for a smooth transition for teachers.

While these books are not meant as a study aid for the Japanese Language Proficiency Test, upon completion of book 1, the student is roughly at the N5 level of the Test, and by the end of book 2, at the N4 level.

It is difficult to understand a foreign language when listening to it, especially at the early stages. Therefore, it is important to become used to listening to the sound of the language and then build up the ability to pick out important information through repeated listening. Through the task-based exercises (listening for necessary information in dialogues, interviews, reports, etc.) that make up these books, the learner can practice his/her communication skills while improving his/her listening comprehension. As the books have also been made to match the degree of progress of learners using *Minna no Nihongo*, they can also practice listening to the words and sentence patterns they have just studied.

The books come with a translation (English, Chinese, Korean, and Vietnamese) of any vocabulary in the books but not in the Main Texts. And for learners without a CD player, an App is available to hear the audio content on smartphones or tablets. Mr. Miller – The Novels

Yuta Yokoyama

For those who have completed elementary Japanese language study, here are two novels about Mike Miller, the main character of the *Minna no Nihongo* series of textbooks. The story progresses in the two books in line with the presentation of the conversations, example sentences, exercises, questions, etc., found in *Minna no Nihongo Shokyu I* and *II*, and the more the person has studied the more he/she can enjoy the novels.

Because they are written using the vocabulary and grammar found in *Minna no Nihongo Shokyu I* and *II*, they are ideal as an extensive reading material after completing elementary level studies. Moreover, the learner can enjoy the sense of accomplishment in having read a whole novel in Japanese.

The first novel comprises 18 short stories and the second, 12 short stories, and as they are complete episodes in themselves, they can easily be used in class.

The second novel in the series is at the N3 Level of the Japanese language Proficiency Test.

The author, Yuta Yokoyama, is a writer and Japanese language teacher, and was the winner of the 57th New Face Literary Prize and nominated for the 151st Akutagawa Prize for *Wagahai wa Neko Ninaru* (Kodansha).

Listening, Thinking, Talking: Beginner Japanese Conversation for Overseas Students – Revised Edition
 Mari Koike, Michiko Nakagawa, Satoko Miyazaki, and Mari Hiratsuka

This conversation textbook allows beginner-level students, who tend to be focused on just memorizing things, to think for themselves while learning by asking themselves such questions as “What do I say in this situation?” “How do I convey what I want to say?” and “How do I answer when I am being spoken to?” The student gradually learns expressions that are used in situations that overseas students will often be in, especially at universities, and by practicing and building up knowledge of short conversations, the student will become able to have long exchanges with people.

The conversation and role-play guidance and explanations of important expressions are translated into English, Chinese, Korean and Vietnamese.

In this revised edition, the whole book was reviewed with regards to the conversational settings and the appropriateness to life now, and the order of the content and settings has been changed. A “Different Situation” section was added to each chapter for students with more spare time for study. A separate booklet of role-play cards and illustrated cards has been added, and the previously accompanying CD has been removed and now the audio of the conversations can be heard on the company’s website. It also comes with a vocabulary list (English, Chinese, Korean and Vietnamese), scripts of the audio content, and a teacher’s guide.

These books have taken the kanji to be studied and broken them down into their component parts, making them easier to recognize and comprehend, so that learners from non-kanji using countries can study kanji words more easily and effectively.

These books are to be used with *Nihongo Shokyu Daichi Main Texts*, and will be most effective under the guidance of an instructor.

In order to improve communication skills, it is important to be able to clearly hear what is being said. To that end, the aim of these books is to have the student be able to recognize and understand the sentence patterns and vocabulary he/she has studied just by hearing them. The questions in each chapter of both books are divided into four sections: I. Listen to the conversation and select the appropriate illustration; II. After hearing the conversation, listen to the question and select which is correct (O or X); III. Listen to a slightly longer, natural conversation and do a task to confirm you have gained the main points; and IV. Listen to a question and answer in your own words. The sentence patterns and vocabulary used in these books are the same as those found in *Daichi Main Texts 1* and *2*, and so they can be used for reviewing each chapter of those books.

Elementary-Level Kanji Workbooks – Conforming to the Syllabus of Daichi Elementary Japanese

Kaori Nakamura, Emi Itoh, Seiko Umezu, Tomoko Makino, and Tomoko Moriizumi

These are workbooks that have been devised so that students from non-kanji using countries can easily learn to read and write kanji. In the books, rather than simply memorizing kanji one character at a time, the kanji are studied through words made up of basic kanji. In each chapter, between 13-18 words made up of 6 to 8 kanji characters are studied, and since the student can learn kanji while reviewing elementary vocabulary, this study method also provides motivation for students from non-kanji using countries.

In the second half of each book, there are mini-quizzes for each chapter, as well as a summary quiz after so many chapters. The two books combined cover the kanji for the N5 and N4 levels of the JLPT. In *Elementary 1*, 160 kanji in 352 words are studied, and in *Elementary 2*, 140 kanji in 311 words. Explanations are provided in English and Vietnamese.

The words studied in each chapter of the kanji workbooks conform to the vocabulary as it appears in *Daichi Main Texts 1* and *2*.

This is the first book in a series of Japanese language textbooks for junior high school students connected with foreign countries receiving Japanese language study support at their junior high schools. This series has been created with the goal of the student being able to attend classes in each school subject in a short period of time. In addition, with the aim of cultivating the ability of students to think on their own and to be able to proactively tackle learning, serious consideration has been given to the students being able to think and understand things for themselves.

This book is an introductory material so that the student can learn the basics of Japanese efficiently. For this reason, the study items are presented in a systematic manner, and are narrowed down to the minimum amount necessary. As the book is the story of set characters at a junior high school, the student can enjoy the story while learning about Japanese culture and customs. As the book has been designed so that the student can progress by him/herself, it can be safely used by teachers and teaching assistants with no experience of teaching Japanese to foreign-born students.

Supplementary teaching/study materials such as verb usage practice sheets and memorization check sheets are available on the following page of the company's website: <https://www.3anet.co.jp/np/en/books/3940/>.

Tackling Conversation: Lower Intermediate Japanese Role-Plays

Junko Nakai, Fumi Kondo, Mariko Suzuki, Ekuko Ono, Tomoko Aramaki, and Tetsuya Morii

A role-play book for those at the end of beginner-level Japanese.

'I've studied sentence patterns, but I still can't use them well to communicate' is something we sometimes hear from learners of Japanese, and it is for these people that this book of role-plays has been made. Comprising 22 chapters covering such subjects as 'Refusing an invitation from one's teacher,' 'Applying for a part-time job on the phone,' and 'Practicing for an interview,' the text covers the many situations and scenarios the overseas student in Japan will come up against.

Without having the teacher present the expressions required for the various situations in advance, the students from the beginning practice the role-plays by themselves, then change the scene and do the role-play again, thereby improving their usage of the relevant expressions as well as their communication ability.

Through using the 'Kizuki Sheets' at the front of the book, the class as a group can become aware of what type of language and expressions are necessary in the given situations.

Short Essays in 12 Steps

Etsuko Tomomatsu

When writing a logical short essay, what is needed is the use of appropriate expressions, correct structure, and the logical construction of the whole essay, not a meandering list of a person's impressions or subjective feelings. However, such an ability to

express oneself cannot be acquired in a short space of time. In this book, essay-style writing is broken down into 12 basic steps, allowing the learner to study such subjects as 'How to use punctuation and symbols,' 'Switching from spoken language to written language,' 'How to write objectively,' 'How to make a summary,' 'How to use quotations,' etc. Each chapter begins with the learner reading an explanation of the basic points, and then trying to write an actual short piece. Laying the groundwork in this manner, from the first stage and then onwards in 12 steps, the learner can build up his or her essay writing ability.

Setsuko Shimano, Akemi Sera, Hiroko Tsujino, Hisai Tsumagata, Yoko Nagami and Sonoe Yamaoka

Brush Up Your Communication Skills in Japanese - Japanese Conversation for Intermediate to Advanced-level Learners

Takafumi Shimizu

In order to communicate smoothly, it not only takes grammar, but also knowledge of the most appropriate words in the relevant situation. Even if you can clearly convey your thoughts and intentions, if you do so in such a way that it hurts the feelings of the listener, having a negative impact on your relationship, this cannot be said to be successful communication. This book is structured in such a way that it gives the learner the opportunity to study in a systematic and efficient manner the most appropriate usage of Japanese words and expressions, enabling the learner to convey his/her thoughts and intentions while maintaining warm relations with the listener.

The book includes asking for permission, making requests and apologies, extending invitations, making offers, giving advice, making complaints and offering compliments.
